

MCOTA Operations Work Team Update

Our work to-date

- Used a logic model framework:
 - Identified our activities and shared outcomes
 - Placed importance on “indicators”
- Overarching goal: RTCCs and TCAPs increase access to transportation by aligning resources and reducing gaps
- Acknowledged that RTCCs and TCAPs are often in different places with regards to their activities and what we’re able to measure

Who has been involved?

- Operations workgroup consists of representatives from
 - RTCCs
 - TCAPs
 - State agencies (MnDOT, DHS, MDE)
- Our group also sought input from other RTCCs and TCAPs

What's next?

- January meeting
 - Formalize how this framework will be included in workplans
 - Identify support that RTCCs and TCAPs need to implement this framework
