DEPARTMENT OF TRANSPORTATION

mndot.gov

Mobility Management:

- Mobility management is an approach to designing and delivering transportation services that starts and ends with the customer.

- It begins with a community vision in which the entire transportation network—public transit, private operators, cycling and walking, volunteer drivers, and others—works together with customers, planners, and stakeholders to deliver the transportation options that best meet the community's needs.

Longer definition: National Center on Mobility Management

"Transportation services that starts and ends with the customer."

A request for a ride from a person involved with a supportive employment organization to their job.

- Required travelling between Sherburne County and Anoka County.

- Barriers to overcome –

  - Service boundaries

  - Creating a transfer site/process

Collaboration included:

- Connect Central Minnesota RTCC

- ConnectAbility of MN

- Tri-CAP

- Anoka TCAP

- Traveler Transit Link

- Met Council

- MnDOT

- City/County

- Area businesses

- Others

"Transportation services that starts and ends with the customer."

Update: Mobility Management- RTCCs and TCAPs

mndot.gov

"It begins with a community vision works together with customers, planners, and stakeholders to deliver the transportation options that best meet the community's needs."
